Finding the way
Creating possibilities for riders, drivers, and cities

Our trip history

On a snowy Paris evening in 2008, Travis Kalanick and Garrett Camp had trouble hailing a cab. So they came up with a simple idea—tap a button, get a ride.

What started as an app to request premium black cars in a few metropolitan areas is now changing the logistical fabric of cities around the world. Whether it's a ride, a sandwich, or a package, we use technology to give people what they want, when they want it.

For the women and men who drive with Uber, our app represents a flexible new way to earn money. For cities, we help strengthen local economies, improve access to transportation, and make streets safer. When you make transportation as reliable as running water, everyone benefits. Especially when it's snowing outside.

One billion connections. And counting.

Across borders, cultures, and languages, we're proud to connect people who need a reliable ride with people looking to earn money driving their car. Your journeys inspire us. Thank you.

The people behind the apps

We're passionate about the cities we call home. Our teams are working to create opportunities for millions of people and improve the way everyone gets from A to B. It's no small task. But we wouldn't want it any other way.
